

A Story of Hope...Hooks and Celebrations!

We have a chance to look at some artefacts from Florence Nightingale's life and use these to help us understand how life was different and how she changed life.

To start off the topic we role play being the Crimean war before Florence. We experience cramped conditions, unhygienic conditions. We try gruel and write letters home. We then experience how Florence changed this and how she impacted nursing by re-living our experience in the war.

In Science we get hands on with experiments. We think about how ramps would help moving around. We come up with our own way of recording and presenting our findings.
