

I can identify human and physical features in my local area.

A human feature is something that is man-made but is part of permanent geography (e.g. buildings, ports, shops etc.) and a physical feature is something that is natural and is part of the physical geography of the natural environment (e.g. cliff, stream, river, forest).

Here are some pictures of things from your local area you may recognise. Can you label them 'human feature' or 'physical feature'?

There is also a table for you to go on a walk or look out of your window and collect some of the human and physical features.

| Human features | Physical Features |
