

Materials

Overview:

We will learn about materials in this topic and what different objects are made out of. We will be learning about different materials and their observational properties.

What I already know...

I know what certain objects are made out of.

I know different objects are soft or hard.

I know things look different such as shiny or not.

By the end of this unit...

I will understand that all objects are made out of a certain material and will be able to name the material.

I will be able to describe materials based off of their observational properties.

I will be able to name and identify materials.

Key Vocabulary

Wood	Shiny	Waterproof
Metal	Soft	Plastic
Rock	Glass	Rough
Hard	Paper	Bendy

Example of materials

Key Questions

What can you see made of wood?

What can you name made of plastic?

What different materials can you name?
